

## Pharmaceutical Manufacturing Core Facility (PMCF)

Welcome to the Department of Industrial and Physical Pharmacy's Pharmaceutical Manufacturing Core Facility. Located in the R.E. Heine Pharmacy Building (RHPH), the Facility provides campus-wide support and capabilities for a wide range of research in pharmaceutical development and manufacturing. Technical support for the Facility is provided by the faculty of Industrial and Physical Pharmacy who have extensive pharmaceutical manufacturing experience in both industrial and academic environments.

Please see our [Equipment and Capabilities page](#) for a complete list of what we can do. If you would like more information about the Facility, its capabilities or how it can be used to assist with your projects, please feel free to contact us. Due to staffing and budgetary limitations, access to the facility is primarily limited to faculty members with full-time or courtesy appointments in the Department of Industrial and Physical Pharmacy and their research groups.
